OOP PROJECT

FINAL PROJECT REPORT

PROJECT TEAM MEMBERS :

➢ BUSHRA POPALZAI
➢ SIMRA ISMAIL

A simple **Java OOP-based quiz game** named **"Brain Cell"** that asks
IQ related questions, takes user input, checks answers, and scores
accordingly.

Features:
Object-Oriented Design

- ➢ **Question Class**
- ➢ **Quiz Engine**
- ➢ **Score Tracking**
- ➢ **Gui based**

UPTODATE PROJECT:

In this updated version of our project, we've transformed the existing codebase into a user-friendly Graphical User Interface (GUI). Building upon the previously developed functionality, the GUI

enhancement provides an intuitive and interactive experience, making it easier for users to navigate and utilize the application's features. This update aims to improve usability, accessibility, and overall user experience, while retaining the core functionality and performance of the original code.

PENDING WORK:

Our project is almost done but database connectivity is still not done we are working on it and will make sure to connect it before lab exam
